

How do I visit another web site?

All sites will have a name (URL) that is unique for that site. We have listed the URLs of some useful sites within link pages throughout this site. Click the URL to hyperlink to the required site. But remember that by doing so you will leave CCHA so make sure our URL is stored within your favourite folder for a speedy return.

If you know the name or URL of a site, e.g. www.bbc.co.uk, www.ccha.org.uk etc. you can jump to the site by typing the URL into your browser address bar in the same way you found this site in the first place.
