

Why do Pages on Some Sites Take Ages to Load?

This could be because the pictures, documents or files on the site are too large. It could also be because your connection to the Internet is slow, or because there are too many people using the Internet at that particular time of day.

We have written our site with speed of download in mind, so please be patient or come back to us later. If over time you find that the same parts of our site are taking too long to download then please let us know by using the contact us page.
